Tom Metzger
(1938-2020)

Foreword:

The forces of unnature led by subhumans seek, through progressive leftism, to destroy all creation of mother nature, the races, the sexes, the ages, etc.

Their main target is that work which has given birth to civilisation and brought order to the planet: the western white race. It is seen as perverse and evil, which makes it worthy of destruction. In this little treatise we will lay the foundations for every white man to learn how to resist and combat these enemy forces.

OUR ENEMY

What is our enemy?

Our enemy is leftist-progressivism made up of the decadent forces of plutocratic capitalism and Marxism.

How is it possible for opposing forces such as capitalism and Marxism to unite?

Because both have their origin in the unnatural ideology of equality and both aim at the same goal: the domination of the planet by subhumans.

How do these forces operate together?

Capitalism funds leftist causes with its money through organisations such as tycoon George Soros' Open Society. Without going any further you can see that big companies like Pepsi or Nike campaign for "Black Lives Matter" or gender ideology.

What is Black Lives Matter?

It is a movement aimed at fighting and destroying the white race under the accusation that it is racist by nature, calling this racism by nature systemic racism.

What is gender ideology?

The denaturalisation of sexuality in human beings.

But aren't we freer than before?

No, progressivism or leftism forbids criticism of its dogmas and is a religion that must be imposed by force.

Why does it forbid criticism?

Because being based on false foundations any questioning would mean its downfall.

Why does leftism wish to destroy the white race?

Because it is nature's most perfect creation, which has brought order and civilisation into every corner of the world. Therefore, only by destroying it can it achieve the desired chaos.

What means does leftism use to destroy the white race?

Assimilators, sub-humans and coloured races.

Who are the assimilators?

Individuals who have no capacity for autonomous thought or reasoning, so that they simply receive without question whatever they are told. The assimilator sees his behaviour reinforced and gratified by the acceptance of his environment.

Who are the subhumans?

The biological waste of the white race (and that of the other races as well), who are aware that they would perish under the laws of nature.

How does leftism use the coloured races?

Leftism makes the coloured races believe that it is fighting for their rights and interests, but what it really wants is to use them as cannon fodder to destroy the white man.

Is leftism beneficial to the coloured races?

No, because although in the short term they gain certain benefits, with the fall of Western civilisation the standard of living of the coloured man, who has benefited from the order imposed by the European, would also fall.

How does leftism position the coloured man against the white man?

Through the theory of the eternal conflict that supposedly characterises human history. The "class struggle" taken to the racial field places the white race in the place of the exploiter and the coloured races as the exploited.

If leftism aims to destroy the white man why is it led by whites?

Leftism is led by the biological waste of the white race, which sees in the healthy white man an obstacle to its interests.

How can leftism be counteracted?

Through white resistance

What is white resistance?

It is the tactics that the white man must follow in order not to be eliminated by the forces of un-nature and to re-establish the natural social order in the future.

What are these tactics?

Preservation, information and education.

What is preservation?

The continuity of the race achieved by remaining true to its lineage, by having children with a racial mate, and by striving for the biological progress of our posterity.

What is information?

The white man's awareness of his nature, history, position and present situation on the planet.

What is education?

The instruction of our children and youth with a view to our preservation and evolution.

How does the system attack the white race?

Through disinformation, by promoting miscegenation and by using golems.

What does disinformation consist of?

Distortive and ill-intentioned propaganda about the white nationalist movement in the media and in education.

How is miscegenation promoted?

Through negative propaganda towards the white race, promoting the cultures of coloured races in white peoples through foreign musical styles and religions.

What are golems?

Golems are individuals created and shaped by the forces of unnature to destroy white nationalism.

How do golems act?

Golems act according to the rules of the anti-nature's smear campaign against white nationalism, committing all sorts of acts alien to our intentions such as hooliganism and other violent actions that are then used by the system to suppress our cause.

So white nationalism is against violence?

Obviously, the white race, contrary to what the propaganda of anti-nature claims, is peaceful. While it is true that in its history it has had to fight for its progress and survival, its level of violence and aggression is less than that of blacks and yellows.

However, they tell us otherwise at school.

The leftist-controlled educational institutions conduct a dirty smear campaign which consists of focusing on and misinforming about those historical events in which the white race has had to fight for its survival and expansion. But it omits all undesirable events from the history of the coloured peoples, portraying them as peaceful and therefore as the antithesis of the white race.

What does white nationalism want?

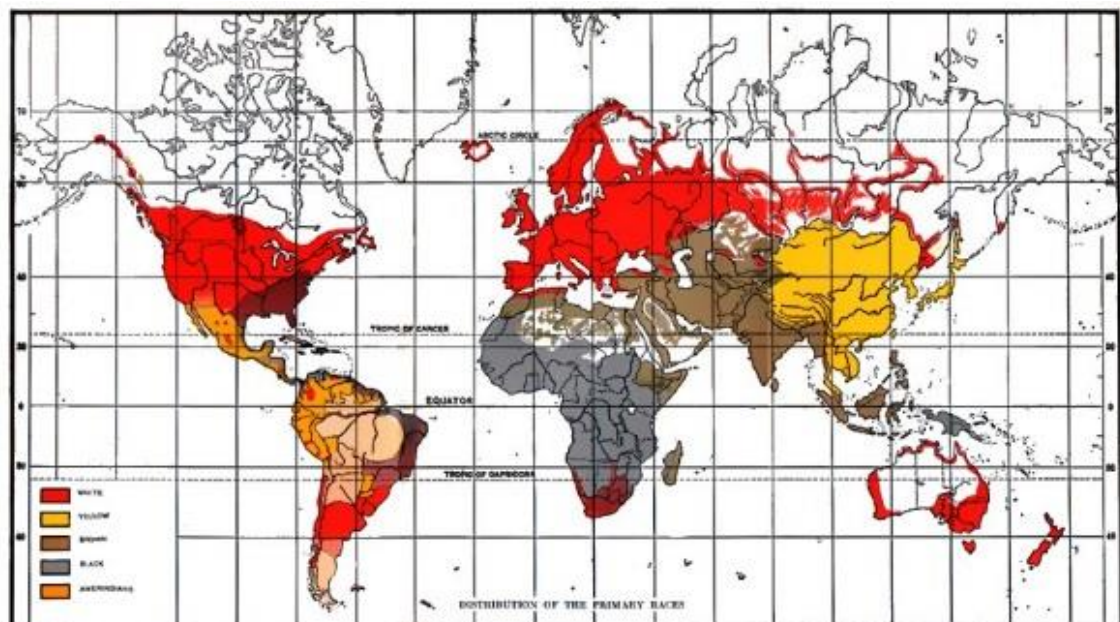

To establish a state where white men can live according to their nature under one flag and language.

Where will the white state be located?

It will cover the countries of Europe, the extreme north and south of America, Australia, New Zealand and the small white nations which the state will see to the formation of in those countries where the white race is in a minority. Negotiating with coloured leaders to carry out such an enterprise.

What will be the relationship with the coloured peoples?

The relationship will be one of friendship as long as their intentions are in accordance with our interests. We must see to it that the coloured nations are not ruled by individuals hostile to the white cause.

Map taken from Lothrop Stoddard's "*The Rising Tide of Color Against White World Supremacy*". The territories marked in red will be those that make up the future white state.

OUR ACTIVISM

How should we fight?

By supporting policies and measures that are in line with our cause, in other words, that favour the path to the reinstatement of the natural social order.

What measures are in keeping with our cause?

Freedom of speech, the right to self-defence, free enterprise and the right to preservation.

Why freedom of speech?

Because it is indispensable for us to conquer and preserve power.

So once white nationalism is in power it will continue to rule?

Of course it will.

Why?

Because only in this way can truth triumph and it is also indispensable for the advancement of the white man.

Could it not be used by our enemies?

No, for their false theories could not affect us in the least, for ours are based on natural laws. Therefore, if they wish to talk and bark let them do so as much as they please, any limitation would only make them stronger and favour them.

Why the right to self-defence?

Because it is a vital right of any group that wishes to preserve itself. Without this right we would be on our way to extinction.

Why free enterprise?

Because it is vital to ensure the advancement and progress of the white man through his natural creativity.

What is the right to preservation?

To be able to ensure the existence and survival of our people without being criminalised for it.

What measures do not further our cause?

All those that affect any white people on Earth.

Can you name a few?

Yes, free abortion, war between white nations, gun control, non-white immigration and giving advantages to non-white peoples.

Should we intervene in violent acts?

No, that only harms our cause and favours our enemies.

How should we act then?

Always according to our creative and noble nature. Every white militant must be an ambassador for his race and movement.

What objectives should we pursue?

We must wrest control and monopoly of the universities, colleges and intelligentsia from leftism and form an intellectual class to champion the white cause.

How can we do this?

By infiltrating the intellectual circles as anti-leftists and once there introduce our ideas by teaching their true essence.

What position should we take in politics?

As we have already said, we should support any policy or candidate that favours a return to the natural social order.

Is the formation of a white nationalist party feasible?

If the laws of the country permit it, such an option can be considered, but our struggle today is different from what it was years ago. Today leftism is not limited to its parties and organisations, but infiltrates all existing institutions. That is the reason why it has won in the USA through the Democratic Party. We must, therefore, act in the same way to defeat it, not limiting ourselves to our organisations, if we have the possibility to create them, but taking our ideas to all areas, institutions or structures of power.

Because our status as white nationalists or social racists can arouse the antipathy of the people, we must often keep our beliefs hidden, so that those who have been deceived by Hollywood films will approach us, even if unconsciously at first, and not understand the true nature of our worldview.

I personally believe that **the success of our cause currently lies in the tactic of the lone wolf**. Because such a mode of activism is most useful to us in achieving the above-mentioned goals. Therefore, **I recommend that every white militant practise the dual activism of social racist lone wolf activism and formal activism in any anti-leftist or close to the natural social order organisation of his or her choice.**

THE WHITE RACE ABOVE ALL!

HEIL HITLER!
