

Progress Report: Project Domain

220601-0345

The domain name seizure has had a bright side!

We have developed a reasonably effective countermeasure.

AND

We are using this for our own promotion.

AND

We are now exploring possible COMMERCIAL use.

The FIRST phase of this project was completed by a team of volunteers in about a dozen countries in nineteen days. (Despite another major project at the same time.)

Estimated total cost of this project to date: under \$5k plus roughly 500 man-hours labor. (Disproportionally executive level. As is common for this type of pilot project.)
